PROFESSIONAL SUMMARY

IT Support and Cybersecurity professional with an MSc in Cybersecurity (University of Limerick, 2026) and a BSc in Computer Science, combining academic depth with hands-on IT operations and security experience in regulated environments, including a national law-enforcement agency and a commercial bank, and current experience in an Irish business. Skilled in Active Directory and Entra ID administration, endpoint support and patching, access control, security monitoring and incident documentation. Conducted an empirical Privacy and Security Risk Assessment of wearable health devices using Wireshark, sslyze, OWASP API Security Top 10, NIST Privacy Framework and ISO/IEC 29134. Currently building a public, hands-on L1/L2 IT support portfolio covering ServiceNow, Microsoft 365, Intune and PowerShell.

TECHNICAL SKILLS

IT Support & Endpoints: Active Directory, Group Policy, Windows 10/11, Windows Server, endpoint protection and patch management, antivirus/EDR, hardware and printer support, asset registers.

Cloud & Identity: Microsoft 365, Entra ID, Exchange Online, Intune, MFA enforcement, Conditional Access, least-privilege access control, Azure fundamentals (AZ-900), AWS Academy.

Security Monitoring (SIEM): Splunk, Microsoft Sentinel, IBM QRadar, Wazuh, Elastic/ELK: log ingestion, alert triage, detection rules, event correlation and dashboards (MSc coursework).

Network & Vulnerability: Wireshark, TCP/IP, DNS, TLS analysis; Nessus, OpenVAS, Qualys; Metasploit, Burp Suite, Kali Linux, nmap in controlled lab environments.

Service Management: ServiceNow, ITIL processes, SLAs, incident triage, escalation and documentation, knowledge base articles, PowerShell.

Frameworks & Compliance: ISO 27001, NIST Privacy Framework, ISO/IEC 29134:2017, GDPR, NIS2, OWASP API Security Top 10, Privacy Impact Assessment.

WORK EXPERIENCE

Admin / IT Support **2026 – Present**
Keldesso Ltd, Ireland

- Provide day-to-day IT and administrative support to staff, acting as the first point of contact for technical issues in an Irish business environment.
- Set up and configure laptops for staff, including operating system setup, software installation, user accounts and peripherals.
- Manage Microsoft 365 user accounts: creating and updating users, assigning licences, resetting passwords and supporting email and Teams access.
- Diagnose and fix printer and peripheral issues, including connectivity, drivers and print queue problems.
- Handle business data and records accurately and securely, maintaining organised documentation in line with data protection (GDPR) good practice.

IT Systems and Security Support Officer **Nov 2020 – 2025**
EFCC – Economic & Financial Crimes Commission, Nigeria

- Administered IT systems, workstations, servers and network infrastructure across a large government agency, supporting end users and ensuring the availability and security of critical operational systems over a five-year tenure.
- Managed user accounts, access controls and identity management in Active Directory, provisioning and deprovisioning accounts in line with security policies and enforcing least-privilege access across departments and offices.
- Monitored IT systems and network infrastructure for security anomalies, performance issues and service disruptions, applying structured diagnostic methodology and maintaining detailed incident and escalation records.
- Supported secure digital evidence management platforms and data handling systems, ensuring the confidentiality, integrity and availability of sensitive operational data in line with strict chain-of-custody requirements.
- Collaborated with inter-agency technology teams and international partners, including the U.S. Department of Justice, on systems interoperability, secure data exchange and information security requirements.

IT Security and Infrastructure Technician (Secondment) **Aug 2013 – Oct 2014**

Polaris Bank Plc, Nigeria

- Supported IT security and infrastructure operations in a regulated financial services environment, enforcing access controls, monitoring for security events and maintaining audit-ready documentation.
- Administered Active Directory user accounts, enforcing least-privilege principles, processing provisioning and deprovisioning, and maintaining accurate records for compliance and audit.
- Performed endpoint patching, antivirus maintenance and vulnerability remediation across the desktop and server estate.
- Monitored system health and escalated security-relevant anomalies with clear documentation, supporting incident response and operational continuity.

IT Support Technician **Mar 2012 – Oct 2013**

Bawoen Trust Limited, Nigeria

- Delivered IT support and security hygiene across endpoints through patch management, antivirus administration and access control enforcement.
- Maintained accurate incident records, asset registers and operational documentation in line with organisational standards.
- Identified and escalated security-relevant issues encountered during routine support.

PROJECTS

IT Support Portfolio – 11 hands-on L1/L2 projects (in progress) github.com/AdeyinkaAyinla/IT-Support-Portfolio

- Public, step-by-step portfolio built for a simulated 25-person Dublin company in a Hyper-V home lab and Microsoft 365 tenant: ServiceNow service desk and SLAs, Active Directory and Group Policy, Microsoft 365, Entra ID Conditional Access, Intune, network troubleshooting, PowerShell automation, and patching, backup and phishing response.

MSc Research: "Your Fitbit is Watching" – A Privacy and Security Risk Assessment of Wearable Health Devices in the Irish Market

University of Limerick | Supervisor: Dr. Gabriel Leen | Submitted August 2026

- Designed and executed a systematic, empirical, GDPR-aligned Privacy Impact Assessment of Apple Watch Series 9 and Fitbit Charge 6, triangulating network traffic analysis, app permission auditing, privacy policy analysis and technical security assessment.
- Ran 20 structured Wireshark capture sessions across pairing, idle, workout and sleep conditions, with SHA-256 integrity hashes per session; identified five advertising and tracking networks (Facebook, DoubleClick, Adjust, ironSource, Google Syndication) active alongside Fitbit health-data uploads.
- Assessed TLS configuration with sslyze 6.3.1, confirming TLS 1.3 throughout the Apple Watch environment, and evaluated companion-app API endpoints against the OWASP API Security Top 10.
- Applied disciplined research data governance: version-controlled documentation and encrypted, local-only storage of capture files.

EDUCATION

MSc Cybersecurity – University of Limerick, Ireland Sep 2025 – Aug 2026

BSc Computer Science – National Open University of Nigeria Aug 2014 – Aug 2017

Ordinary National Diploma, Computer Science – Kwara State Polytechnic, Nigeria Aug 2010 – Aug 2012

CERTIFICATIONS

CompTIA A+ · CompTIA Network+ · Microsoft Azure Fundamentals (AZ-900) · ISC2 Certified in Cybersecurity (CC)
In progress: ITIL Foundation · Microsoft MD-102 Endpoint Administrator · CompTIA Security+

AWARDS & ADDITIONAL INFORMATION

- **Award of Recognition for Outstanding Service** – U.S. Department of Justice, Federal Bureau of Investigation (FBI)
